

## **Sprint 1 Report**

Product name: SmartShift

Team name: None / Same as Product Name

Sprint Completion date: Tuesday, April 25, 2023

Revision number: 1.0 / 1.1

Revision date: 4/25

Scrum Master: Liza Sokolova

---

### **Actions to Stop**

- N/A - finished all currently assigned tasks/user stories for Sprint 1
  - We finished all our self prescribed tasks in a timely and efficient manner, even while learning a new coding language and environment. We all managed to make every meeting and were productive during them.

---

### **Actions to Continue**

- Merging complete Sprint 1 code between separate team member branches in order to have one complete main branch to work off of for future work in sprint 2 and in order to have a working product to show for sprint 1.
- Continue with our current scrum meeting times, since they're well-spaced throughout the week and we can make it to all of them

---

### **Actions to Start**

- Begin setting open hours where people work quietly on Discord open to talking through code together.

- 

---

### Work Completed / Not Completed

- Completed:
  - User Story 1.0: As a student who needs help managing time, I want **a pomodoro timer** to keep me on track and give me break times. (2 story points)
  - User Story 2.0: As a student who sometimes wants to keep working through a break time, I want the option to **customize my pomodoro timer or skip past break** times to keep working on a task. (2 story points)
- Not Completed:
  - N/A (Everything was complete - just haven't finished all necessary merges to have one complete product at end of sprint 1).

---

### Work Completion Rate

- Total number of user stories completed: 2/2
- Total number of estimated ideal work hours completed: 21 hours
- Total number of days during sprint 1: 14
  - Note: first 7 days taken by spike of learning React-Native (each member wasn't familiar with it prior to this sprint)
- Total average hours worked:
  - User story 1: ~13 hours

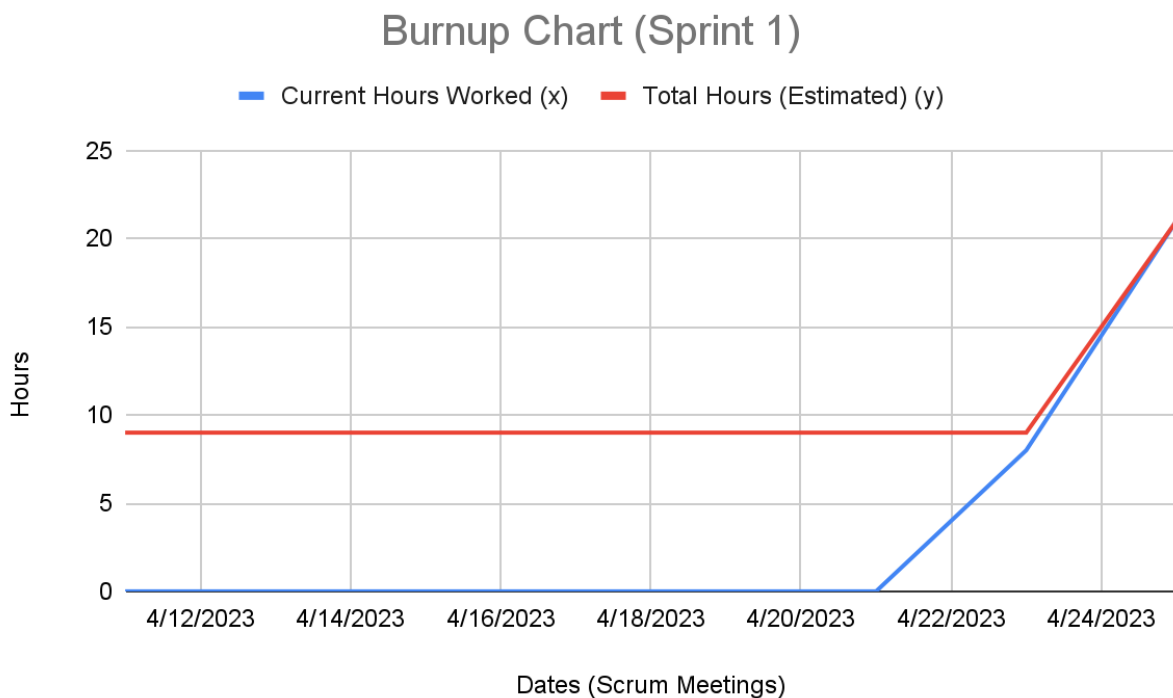

- User Story 2: ~8 hours
- User Story per day (of days actually worked on user story):
  - 2 user stories in 4 days (total) according to *Burnup Chart*.
- Work hours per day:
  - 5.25 hrs per day (on average of the 4 days worked on user stories (from the *Burnup Chart Data*))

---

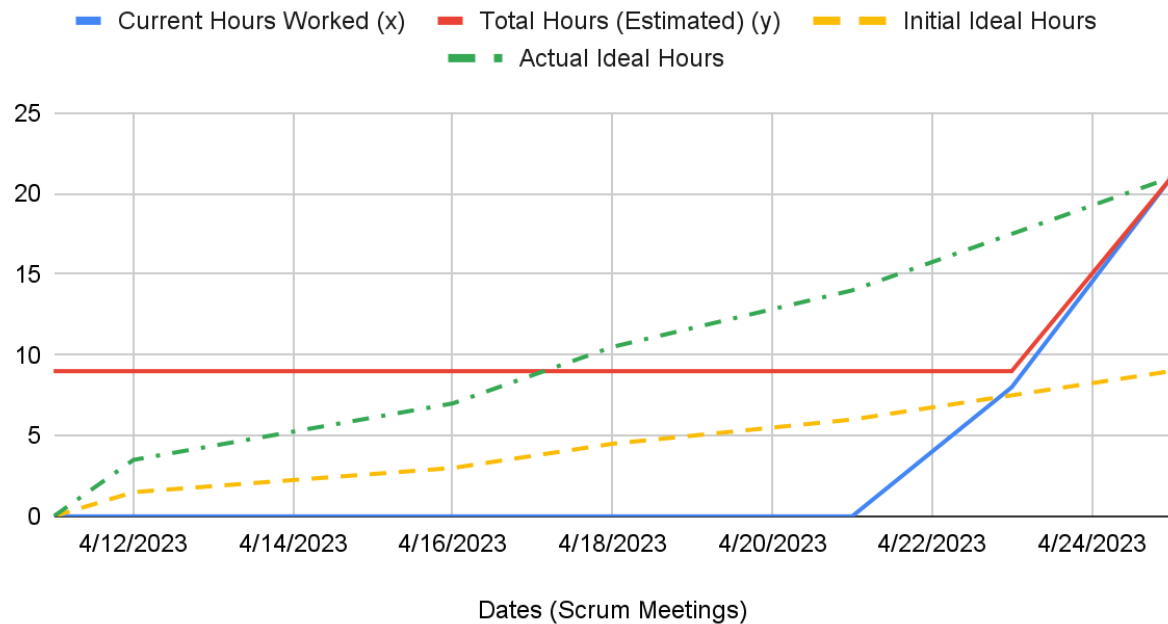

### Final Sprint 1 Burnup Chart

- Graph: (total hours (y-axis) vs. hours actually done so far (as of \_ scrum meeting) (x-axis))
